**ELECTION**

Sir:

In response to the Examiner's Action mailed March 21, 2005, Applicant elects to prosecute with traverse Invention Group II, claims 21-26 drawn to a method of assembling a tower, classified in class 52.

Based on the restriction requirement, Applicant lists embodiments as follows:

- I. Claims 18-20, group I, drawn to a tower assembly, classified in class 52.
- II. Claims 21-26, group II, drawn to a method of assembling a tower
- III. Claims 27-29, group III, drawn to tower braces, classified in class 52.
- IV. Claim 30, group IV, drawn to a method of bracing, classified in class 52.

Applicant disagrees with the restriction requirement for several reasons. A policy consideration behind a restriction requirement would suggest that separate inventions exists that inherently would include separate prior art searches, examinations, examiners, etc. The Primary Examiner does not state that different art units and/or different examiners would need to search and examine the inventions of Invention groups I, II, III and IV. If Invention groups I, II, III and IV can be searched by the same art unit and further by the same examiner, then having different examiners conduct separate searches and examinations would not create an undue time and financial burden on both the patent office and on the applicant.

Again, in reference to the Restriction Requirement, Applicant elects to prosecute, with traverse, Invention group II, Claims 21-26, drawn to a method of assembling a tower.

Respectfully submitted:
